As a steward of public health, a UGA Bulldog and a member of the greater Athens community, I PLEDGE to –

**WASH MY HANDS**
- In order to minimize the amount of germs I spread,
- After handling something that is not a personal belonging,
- After interacting with another person,
- After opening a door, or other items that can carry germs.

**WEAR A MASK**
- In order to prevent spreading respiratory droplets,
- Any time I am around another person in public,
- Keeping my mask on me even when I’m not using it,
- And disinfecting my cloth masks at the end of each day.

**WATCH MY DISTANCE**
- In order to minimize my spread of airborne particles,
- In order to protect myself against the airborne particles of others,
- By following all social distancing signs and floor stickers,
- And being mindful of where I am in relation to others in public, on transportation, in the workplace and outside.

**REPORT MY SYMPTOMS IN DAWG CHECK**
- In order to support UGA’s prevention and mitigation efforts,
- If I begin experiencing COVID-19 symptoms,
- If I think I could have been exposed to the virus,
- And, most importantly, if I have a positive test.

PROTECT MYSELF. PROTECT OTHERS. PROTECT ATHENS.
