Doctor of Public Health Student Handbook

2021-2022

University of Georgia Policy Statement

The University of Georgia, College of Public Health and the Department of Health Policy and Management reserve the right to change policies, curricula, or any matter in this handbook. Students will be notified of major changes as soon as practicable after they are decided. Students will have the option either to remain under the policies and curricula in place at the time of matriculation or to accept new policies and curricula adopted by the program.
I. Doctor of Public Health Program Administration (Updated September 9, 2021)*

Zhuo (Adam) Chen, PhD, MS, MMgt  
DrPH Program Coordinator  
Health Policy & Management  
zchen1@uga.edu

M. Mahmud Khan, PhD  
Department Head and Graduate Coordinator  
Health Policy & Management  
Mahmud.khan@uga.edu

Mumbi Anderson, Ed.D, MPH  
DrPH Practice Coordinator  
(Acting) mumbi@uga.edu

Lindsey Welton  
DrPH Admissions Coordinator  
lindseyt@uga.edu

DrPH Program Committee:  
Zhuo (Adam) Chen, PhD, MS, MMgt (Chair) zchen1@uga.edu  
Associate Professor, DrPH Program Coordinator, Health Policy & Management

M. Mahmud Khan, PhD Mahmud.khan@uga.edu  
Professor, Department Head, and Graduate Coordinator, Health Policy & Management

Joel Lee, PhD joellee@uga.edu  
Professor Emeritus, Health Policy & Management

Cham Dallas, PhD cdallas@uga.edu  
University Professor, Health Policy & Management

Janani Rajbhandari-Thapa, PhD jrrthapa@uga.edu  
Associate Professor, Health Policy & Management

Donglan (Stacy) Zhang, PhD dzhang@uga.edu  
Assistant Professor, Health Policy & Management

Kelly McCormick Hatfield, MSPH kelly.hatfield@uga.edu  
DrPH Student, Health Policy & Management

*Students will be notified of any changes in the names and titles of the program administrators, if any.
II. The College of Public Health

The College of Public Health (CPH) at the University of Georgia (UGA) promotes health in human populations through innovative research, exemplary education, and is engaged in service dedicated to preventing disease and injury within the state and around the world.

CPH is composed of four academic departments (Epidemiology and Biostatistics (EPID & BIOS), Environmental Health Sciences (EHS), Health Promotion and Behavior (HPB), and Health Policy and Management (HPAM), and four institutes, Global Health Institute, Health Informatics Institute, Institute for Disaster Management, and Institute of Gerontology.

III. The Department of Health Policy and Management

A. Mission, Vision, Goals, and Objectives

The mission of the Department of Health Policy and Management (HPAM) is to advance the health of the public by developing leadership expertise and promoting an evidence-based approach to public and private policy making in health and medicine.

IV. Student Responsibilities and Code of Ethics

A. Academic Honesty and Codes of Conduct

Students at the University of Georgia are responsible for maintaining and adhering to the strictest standards of honesty and integrity in every aspect of their lives. Honesty in academic matters is a large part of this obligation. Specific regulations governing student academic conduct are contained in the UGA Student Handbook and in the UGA culture of honesty policy: http://www.uga.edu/honesty/ahpd/procedures.html.

The Office of Student Conduct, located in Memorial Hall, maintains and publishes the Code of Conduct for the University office. The Code of Conduct can be found at https://conduct.uga.edu.

No student shall perform, attempt to perform, or assist another in performing any act of dishonesty on academic work to be submitted for
academic credit or advancement. A violation of the honesty policy does not rest upon intent. Accordingly, a violation of the honesty policy for any reason is subject to disciplinary action.

B. Academic Standards in DrPH Coursework
Students in this program must average at least a B (3.0 on a 4-point system) over all graduate courses attempted. Doctor of Public Health students must maintain “Satisfactory” performance or at least a grade of a B in all DrPH core courses. Two grades of “Unsatisfactory”, or two grades of “B- (B minus)” or below, or one “unsatisfactory” or one B- or below will result in dismissal from the DrPH Program. Please see section VI.I Program Dismissals (page 9).

V. Administration of the Doctor of Public Health Program

A. Doctor of Public Health Program Coordinator and Academic Advisor
Advising for coursework will take place each semester. The Doctor of Public Health Program Coordinator or a member of DrPH program committee will serve as the advisor for DrPH students regarding core coursework and electives. DrPH students are encouraged to reach out to program committee members to discuss their research ideas and/or to identify their academic advisor.

B. Doctoral Dissertation Committee
The Doctoral Dissertation Committee is selected in consultation with the doctoral student, Academic Advisor, and DrPH Program Coordinator. The committee consists of no less than two Graduate Program faculty members from the College of Public Health, the University of Georgia, and one outside, non-UGA committee member. The committee may be expanded to include additional members. See section X. Doctor of Public Health Dissertation Research (page 15) for additional information.
VI. **Doctor of Public Health General Information**

The Doctor of Public Health (DrPH) program at the University of Georgia is an advanced professional degree program for professionals working in the fields of public health and health care. The program is congruent with the Institute of Medicine’s (IOM) recommendations for linkages of academic and field experiences in public health. The program curriculum is competency-based and is designed to prepare public health professionals with the tools necessary for successful leadership in addressing complex public health problems at the local, state, national, and international levels.

The DrPH curriculum provides students with practical training in management, leadership, policy development, and policy analysis specifically applicable to health sector. Components of the program will include the acquisition of core as well as specialized knowledge through coursework, interdisciplinary seminars, special studies, an Applied Practice Experience (APE) and the development of a doctoral dissertation relevant to the research and practice of public health and health care delivery.

**A. Graduates of the Doctor of Public Health program are expected to:**
- Act as public health leaders;
- Comprehend and integrate knowledge across traditional academic disciplines;
- Provide sound recommendations and advice to national and international agencies in public health;
- Communicate effectively with governments, academia, non-governmental organizations, and the public.

**B. General Degree Requirements**

Students in the Doctor of Public Health program must complete 57 graduate credit hours: 30 hours of Core courses, 12 hours of Elective courses, 3 hours of Applied Practice Experience, and a minimum of 12 hours of Dissertation research and preparation.

**C. Annual Progress Report**

The DrPH Annual Progress Report documents the overall progress the student has made during the past academic year and must be completed by the end of each summer term while in the program. Each student provides a summary of
the progress made within the year pertaining to course completion, the program proposal, the Portfolio, and the dissertation product (where applicable). Failure to complete an Annual Progress Report will cause a hold to be placed on registration until the Annual Progress Report has been completed and accepted by the Research Advisor or Academic Advisor and the Program Coordinator.

Students will receive written feedback based on the annual evaluation. The written feedback will indicate if satisfactory progress is/is not being made and recommendations for improvement will be provided to each student.

D. Continuous Enrollment/Residence
A student must be continuously enrolled for a minimum of 2 of the 3 semesters each year (Fall, Spring and Summer). Students who do not enroll in at least 2 out of 3 semesters each academic year must apply for readmission to the program. If a student is accepted after applying for readmission, the academic rules and standards in effect at the time of readmission will supersede those in effect at the time of initial admission. Additional information can be found at the University of Georgia Graduate School. https://grad.uga.edu/index.php/current-students/policies-procedures/academics/enrollment-policy/

E. Time Limitations
The Department of Health Policy and Management requires that Doctor of Public Health students complete the required and elective coursework within six years of matriculation or risk having to repeat course work. Transferred credits must be within the six-year period as well. This time requirement dates from the first registration for graduate courses on a student’s program of study. See section IX.C for time limit post candidacy.

F. Satisfactory Progress Towards Degree Completion
Doctor of Public Health students must maintain “Satisfactory” performance in HPAM 9300: Doctoral Dissertation. Two (2) “Unsatisfactory” grades in HPAM 9300 will result in dismissal from the DrPH program. Please see program dismissal policy on page 9.

G. Transfer of Credits
No courses taken prior to a doctoral student’s admission to their degree program at The University of Georgia are eligible for transfer. Doctoral students who have matriculated and are active in the Doctor of Public Health program may take courses at other accredited institutions and have up to nine semester hours of credit transferred to the UGA program of study with the prior approval of the DrPH Program Coordinator.

H. Electives
Students may select their electives from a list of preapproved courses or choose courses not appearing on this list based on a discussion with their academic or
dissertation advisor. Advisors should report all non-preapproved elective selections to the DrPH Program Coordinator in writing. The DrPH Program Coordinator will provide a list of preapproved courses at the start of the Fall semester or as appropriate.

Note: The five MPH core courses within the College of Public Health will not apply to the DrPH degree as they are considered as prerequisite for DrPH program admission. The five courses are: BIOS 7010 – Introduction to Biostatistics I; EHSC 7010 – Fundamentals of Environmental Health; EPID 7010 – Introduction to Epidemiology I; HPAM 7010 – Introduction to Health Policy and Management; HPRB 7010 – Social and Behavioral Foundations of Public Health.

I. Program Dismissals
Students are expected to demonstrate professional behavior while enrolled in the graduate program and to act in a manner that demonstrates integrity and respect for others and the campus environment. Students are expected to adhere to all UGA policies governing research and academic conduct, non-discrimination and anti-harassment, and workplace violence. See the following links for detailed information:

- UGA Academic Honesty: https://honesty.uga.edu/Academic-Honesty-Policy/
- UGA Workplace Violence Policy: http://safeandsecure.uga.edu/workplace.html

A student who has not made satisfactory and sufficient progress towards the completion of the degree will be dismissed from the program at the end of the semester in which failure to progress occurs. A lack of satisfactory progress towards the degree is defined as: 1) Two consecutive semesters with a semester GPA lower than 3.0, 2) Two failed attempts at the comprehensive examination, 3) Receipt of a grade of “Unsatisfactory” in two semesters of HPAM 9300, 4) Failure to comply with degree program time limitations, 5) Failure to comply with Program, Department, Graduate School, and University policies and procedures (i.e., continuous enrollment and Academic Honesty).

J. Appeals
Students may appeal the decision of dismissal from the Doctor of Public Health program to the Department of Health Policy and Management, College of Public Health Curriculum and Academic Programs Committee (CAPC), and the Dean of the College of Public Health within 30 days of being notified of the decision. Additional information can be found at: http://grad.uga.edu/index.php/current-students/policies-procedures/academics/appeals/
## K. Doctor of Public Health Program Competencies

</tbody>
</table>
VII. Doctor of Public Health Curriculum

Students in the Doctor of Public Health program must complete the credit hours in four categories: (1) Doctor of Public Health Core (2) Elective Coursework (3) Public Health Practicum and (4) Doctoral Dissertation Research. The Doctor of Public Health Program Committee has general oversight of the academic aspects of all students and candidates.

* Total credit hours for electives: 12 (up to 9 credit hours can be transferred). Students can choose to take elective courses starting from the spring semester of Year 1 or later but the total number of credits must satisfy program requirements. A minimum of four electives are required.

^ Minimum credit hours required for Doctoral Research: 12

57 Hours Minimum Required for Degree Completion
VIII. Doctor of Public Health Applied Practice Experience Requirement

The Applied Practice Experience (APE) provides students with an opportunity to apply the knowledge and skills acquired through their coursework and further develop and demonstrate attainment of program competencies. All Doctor of Public Health students are required to engage in one or more applied practice experiences in which they are required to complete at least one project that is meaningful for an organization and to advance public health practice. Relevant organizations include governmental, non-governmental, non-profit, industrial, or for-profit settings. The student’s own work setting may be used, however, the selected project must not be in the realm of the day-to-day work responsibilities of the student. The work product may be a single project or a set of related projects that demonstrate depth of competence. The applied practice experience must be approved, in advance, by the Doctor of Public Health Program Coordinator and DrPH Practice Coordinator.

Students will be eligible to sign up for the three-credit hour course to complete the Applied Practice experience if the following conditions are met:

1. The student is in good academic standing as outlined by the DrPH program and Graduate school with a GPA of 3.0 or better and no grade less than B in core courses.
2. The student has demonstrated professionalism during coursework.
3. The student has completed at least two semesters in the DrPH program and completed all core courses, however, the final core course and the APE course may be taken concurrently.
4. The student has met all departmental requirements, completed APE Advisement, submitted all required documentation, and received approval from the DrPH Coordinator and DrPH Practice Coordinator.
IX. Comprehensive Doctoral Examination

All Doctor of Public Health (DrPH) students will be required to pass a formal, comprehensive examination consisting of written and oral components that address the DrPH program competencies before being admitted into doctoral candidacy. To be eligible to sit for the examination, a student must have completed all DrPH core coursework, or must be enrolled in the remaining, not yet completed courses in the semester of the examination. This does not include the DrPH Applied Practice Experience or elective requirements, which may be completed following the examination. Some additional details on comprehensive examination are provided in Annex A of the handbook.

A. Examination Content
The written examination will consist of broad integrative case studies addressing the breadth of competencies on the following Council on Education for Public Health (CEPH) domains: Data & Analysis; Policy & Programs; Leadership, Management & Governance; and Education and Workforce Development.

B. Admission to Candidacy
Admission to candidacy for a doctoral student is requested immediately after the successful completion of the comprehensive examination. The following is a complete list of requirements for admission to candidacy:

1. All prerequisites set as a condition to admission have been satisfactorily completed;
2. Completed all coursework and the public health practicum requirement;
3. The final program of study has been approved by the Doctor of Public Health Program Coordinator and the HPAM Graduate Coordinator;
4. An average grade point of 3.0 (B) has been maintained on all graduate courses taken and on all completed courses on the program of study (no course with a grade below “B-” may be included in the final program of study);
5. Comprehensive doctoral examinations have been passed.

C. Time Limit on Candidacy
The dissertation must be completed within five years following admission to candidacy. Student should carefully select the scope of the dissertation so that the work can be completed within the time limit. In exceptional circumstances, a student may request extension of time limit by providing a detailed timeline and plan for completing the dissertation with supporting letters from the chair of the dissertation committee, the DrPH Program Coordinator and the Graduate Coordinator of HPAM Department.

See Section VI.E for time limit on coursework.
This request for an extension of time must include the specific reasons that the student did not complete the requirements in the time allotted. The student must include a specific timeline for the completion of degree requirements. The student’s major professor must review the student’s request and write a letter to the Vice Provost and Dean stating approval or disapproval of the petition. The graduate coordinator and department head must review the major professor’s recommendation and indicate their concurrence by writing an additional letter. If they do not concur with the recommendation, further information should be provided by them in the letter. An extension of time may be granted only on conditions beyond the control of the student.

X. Doctor of Public Health Dissertation Research

The University of Georgia Doctor of Public Health integrates foundational knowledge, such as public health theories and methods; competencies of leadership, management, communication and innovation to enable change and field engagements to translate knowledge into practice. The culminating experience will provide the candidate with an opportunity to practice and develop their personal leadership skills while engaging in a project that contributes substantively to public health results. The dissertation is expected to analyze and propose solutions to health policy, management or leadership issues by applying new theoretical or analytic approaches to current problems in health care.

Additional guidelines are in UGA DrPH Dissertation Guide.

A. Selection of Dissertation Topic and Format

Each candidate will prepare a dissertation demonstrating the ability to analyze and solve complex, practice-based problems in public health policy, management and leadership. The dissertation should reflect a variety of perspectives needed to meet major public health challenges and should include explicit solutions, strategies and implications for high-level public health and health care leadership officials. Students will apply DrPH foundational and additional competencies in the process of developing and executing their dissertation projects. Thus, an acceptable DrPH dissertation will:

- Address a complex public health problem of strategic importance to public health;
- Advance or contribute to the evidence base of public health practice;
- Utilize an explicit methodology and study design that clearly specified and specifically designed to address the problem selected for investigation, as effectively addressing complex problems often requires an integration of analytic methods;
- Draw upon and be grounded in both the scholarly and practice literature in an effort to establish a conceptual framework for the dissertation;
- Contain clear public health leadership implications;
- Must be publishable findings or research.
The format will be determined largely by the nature of the public health problem addressed. Appropriate dissertation formats may include:

- Case studies and policy, management, and leadership analyses;
- Development of new practice interventions;
- Design and implementation of public health programs;
- Program or policy evaluations;
- Historical program or policy analyses;
- Substantial legislative proposals.

The Doctor of Public Health dissertation could be based on original and/or outside data collection by the student. Use of secondary data for Doctor of Public Health dissertation is also acceptable, if appropriate for the dissertation topic selected.

**B. Dissertation Committee**
The dissertation committee will consist of 3 members: at least 2 Faculty members (1 must be from the Department of Health Policy and Management), and 1 outside practitioner in the related field of research. Chair of the dissertation committee must be a regular Graduate Program Faculty at College of Public Health, UGA. A regular Graduate Program Faculty at other colleges and units of UGA may serve as a Chair of the DrPH dissertation committee with strong justifications. Outside committee members must:
- hold a terminal degree in their field or have a high level of expertise,
- be approved by the DrPH Program Coordinator and the Graduate School.

**C. Dissertation Proposal (Prospectus) Defense**
The dissertation proposal should provide a clear and thorough plan of the proposed research. The proposal should include the first three chapters of what will become the dissertation. The three chapters are: Chapter 1: Introduction and Background; Chapter 2: Literature Review; Chapter 3: Methods.

The students should request approval of the proposal using “Doctor of Public Health (DrPH) Program Dissertation Proposal Defense Form” from their committee and file the signed form with the DrPH Program for record.

Students must be registered during the semester they defend their dissertation proposal.

**D. Doctor of Public Health Final Dissertation Defense**
Candidates must be registered during the semester they have their final oral defense of their dissertation. If the student plans to defend during the summer, he or she must be registered for dissertation credit hours during the summer session.
Annex A: Comprehensive Examination

All students eligible to take the comprehensive examination should contact the DrPH Coordinator of their intention to take the examination at least three months prior to the scheduled examination start date. The examination will be made accessible via eLC beginning at 5:00 pm on the start date of the examination. There will be two offerings of the comprehensive examination in an academic year: around mid-October and around mid-March. Students can select any of these two offerings to sit for the examination.

The comprehensive examination is divided into three sections. The sections are listed below:

1. Data and Analysis,
2. Policy and Programs, and
3. Leadership, Management and Workforce.

Each section will include a multi-part question or case study that is reflective of the programmatic competencies and the relevant content covered in the DrPH core courses. There will be an information session on the comprehensive exam to be arranged by the Graduate Coordinator of the Department about two months prior to the examination date (in August and in January every year). The faculty members writing the questions will be present in the information session to provide general guidelines on the examination and type of questions to expect. Students will have the opportunity to ask questions about the format of the examination and/or any other examination related issues.

Each exam will be deidentified and graded blindly. Each student will receive an examination identification number from the Graduate Coordinator of the Department that will be used on the exam responses and the corresponding file names. Students should not mention their names or any other form of personal identification in their responses to the questions. Full examination instructions will be sent to students via email and/or placed on the eLC Doctor of Public Health Comprehensive Examination webpage. The faculty members writing the examination questions will grade the questions and the grades will be sent to the Graduate Coordinator of the Department within three weeks after the final comprehensive examination date.

A grade of 75% or higher must be achieved in order to successfully pass each section of the exam. Graduate Coordinator of the Department will notify students on the examination results within five weeks from the final day of the comprehensive examination. After successful completion of all three sections of the written comprehensive examination, the student can proceed to the oral comprehensive examination.

In the oral portion of the comprehensive examination, student may present a potential
dissertation prospectus, explaining the problem being addressed by the proposed
dissertation research, methodology to be used, analytical or statistical approaches,
results and policy implications. All students passing the written examination are required
to take the oral comprehensive examination in the same semester the written
examination was successfully completed.

In case a student fails one or more sections of the comprehensive examination, the
sections in which the student failed will be graded by second readers selected by the
Graduate Coordinator of the Department. The second readers will evaluate the
examination questions independently. Graduate Coordinator will receive the grades from
the first and second graders. If the second grader’s grade agrees with the first grader, the
final grade on that question will be “Fail”. In case of disagreement on the grade by first
and second grader (first grader grading the section as “fail” but the second grader
grading the section as “pass”), Graduate Coordinator will arrange a meeting of the two
graders to come up with a consensus grade and the consensus grade will be the final
grade for the section. If a student fails one section out of three sections of the
examination, the student will be permitted to retake that section in the next offering of
the comprehensive examination. If a student fails two or more sections of the
examination in the first attempt, she/he will have to retake the entire comprehensive
examination (all three sections) in a future offering of the comprehensive examination,
preferably the next offering of comprehensive examination.

A student may request reevaluation of grades assigned on the comprehensive
examination by notifying the Graduate Coordinator in writing within 10 days after the
receipt of the results via e-mail. The Graduate Coordinator will review the request based
on the information provided in the request and, if needed, will request the graders to
reevaluate the sections based on the specific issues and concerns raised in the
reevaluation request. The graders will provide their reevaluation results within a week
after the start of the reevaluation process.

If a student fails one or more sections of the comprehensive examination in the
second attempt, the student will immediately be dismissed from the Doctor of Public
Health Program.

Dissertation Proposal (Prospectus) Defense

A. **Instructions for DrPH Students:**
Prior to submitting your dissertation topic approval request to the DrPH Committee, confirm with members of your dissertation committee have read and support your topic approval request. Once you have finalized your dissertation topic with your dissertation committee, complete the form and include this document with your dissertation topic approval request, which should be submitted to the Program Coordinator drph@uga.edu no later than one week of the proposed date of proposal defense.

**Competency Requirements**
On a separate page, DrPH candidates must identify the foundational and concentration competencies (listed in the DrPH Program Guidebook) that they will apply in the process of developing and executing their dissertation projects. Candidates must also discuss how they intend to synthesize these competencies to achieve their objectives.

B. **Instructions for Dissertation Committee Members:**
Please read your doctoral candidate’s dissertation topic approval request and, if necessary, suggest any needed revisions. A typical successful proposal should have the following components:

- On a title page, present the formal title of the dissertation and the list of your committee members and clearly state the public health question that you are addressing in this dissertation.
- How will your dissertation improve the public’s health in a practical way by contributing to the solution of a current public health problem while providing some generalizable lessons practitioners can use?
- How will the research be carried out? (The more explicit students can be concerning their research design and methods, the greater the likelihood for approval by the DrPH Dissertation Committee.)

The program’s goal is to have the student explicitly identify the public health practice relevance of the topic and briefly describe his or her chosen methodology so that the DrPH Dissertation Committee has confidence it will be completed.

- Once the student has produced a satisfactory topic approval request, please signify your agreement by checking the box next to your name.
- After the topic is approved by the DrPH Committee, the student will work with you and your colleagues on the student’s dissertation committee to complete a formal dissertation proposal and, ultimately, his or her dissertation.
