

cphadm@uga.edu

COURSE PLAN - ENVIRONMENTAL HEALTH SCIENCE MAJOR

(Area of Emphasis : Public Health Practitioner)

This emphasis prepares students for graduate level work or employment in the field of public health. Courses include obtaining certifications that will make students competitive in the job market: HAZWOPER and HACCP

Freshman and Sophomore years (61 hours)

Courses that meet the General Education Curriculum Areas I through V may be found at: http://bulletin.uga.edu.

Area I : Foundation Courses (9 hours)

- ENGL 1101 (3)
- ENGL 1102 (3)
- MATH
 - MATH 1113 recommended (3-4)

Area II : Sciences (8 hours)

- Physical Sciences (3-4)
- CHEM 1211/L/D recommended (4)
- Life Sciences (3-4)
- BIOL 1107/L recommended (4)

Area III : Quantitative Reasoning (4 hours)

• BIOS 2010 recommended (4)

Area IV : World Languages and Culture (9); Humanities and the Arts (3)

opportunity to earn course credit by participating in research projects with EHS faculty.

- World Languages and Culture (3)
- World Languages and Culture (3) •
- World Languages and Culture (3) •
- Humanities and the Arts (3) •
 - COMM 1110 recommended

Area V : Social Sciences (9 hours)

- HIST 2111 or 2112 recommended (3)
- POLS 1101 recommended (3)
- Area V class of student's choice (3)

Area VI : Environmental Health Science (19 hours)

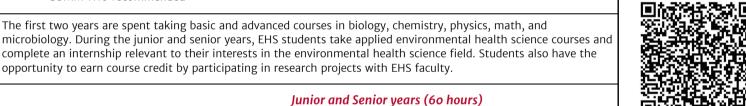

All must be completed with a C or better

- BIOL 1108/L Principles of Biology II (4)
- CHEM 1212/L/D Freshman Chemistry II (4)
- CHEM 2211/L Modern Organic Chemistry I (4)
- EHSC 2100 Environmental Physiology (3) spring only • or (pre-med/dent)VPHY 3100 - Elements of Physiology (3)
- PHYS 1111/L Introductory Physics I (4)

Other Requirements

- 120 total credit hours are required for graduation; additional general electives may be needed.
- PEDB of your choice (1 hour)
- FYOS 1001 (1 hour)

Junior and Senior years (60 hours)

A grade of C or better is required for all major required and major elective courses.

Major Requirements (36-37 hours)

CPH Core (9 hours)

- EPID 4070 Foundations of Epidemiology (3)
- HPAM 3600 Introduction to Health Policy (3)
- HPRB 3010 Health Promotion in Public Health (3)

EHS Core (19 hours)

- EHSC 2020 Orientation to EHS (1)
- EHSC 3060 Intro to Environmental Health (3)
- EHSC 3910 Internship in EHS (3)
- EHSC 4080 Environmental Air Quality (3) Spring only
- EHSC 4150 Solid & Hazardous Waste Mgmt (3) Fall only
- EHSC 4490 Environmental Toxicology (3) Fall only
- EHSC 4910 Environ Health Seminar (1)

Public Health Practitioner Core (12 hours)

- EHSC 3950 Training/Hazard Waste Workers
- EHSC 4100/L Industrial Hygiene
- EHSC/FDST 4320/L Food Safety Control Prog. (3) Fall only
- MIBO 3500/L Microbiology & Lab

EHS Major Electives (18 hours)

Major electives should be chosen in consultation with your academic advisor. Eighteen total hours are required in this category.

Nine hours must come from the EHSC list below.

The remaining nine hours may come from a combination of the EHSC courses listed and from the list of approved non-EHSC major electives (found on page 2).

EHSC options (9 hour minimum)

Pick 3 classes from the list below for a total of at least 9 hours

1.

2._

3.

EHSC Options

(2) Summer only

(3) Fall only

(4)

- EHSC 4090 Bioremediation
- EHSC 4200 Climate Change & Public Health
- EHSC 4310/L Environ. Microbiology
- EHSC 4350/L Environ. Chemistry
- EHSC 4400 Environ. Issues in Devel. World
- EHSC 4610 Water Pollution & Human Hlth
- EHSC 4700 Genetic Applications in EHS

Non-EHSC options (9 hours)

Pick 3-4 classes from either list for a total of at least 9 hours (full list on page 2)

- Page 1/2 Effective Fall 2024

(3) Spring, even years

(3) Spring, Summer

(3) Spring, odd years

(3) Fall, odd years

(4) Spring only

(3)

(3)

Non-EHSC Major Elective:

Major electives should be chosen in consultation with your academic advisor. Earning over 3 credit hours in EHSC 3910 may count towards non-EHSC electives, with department approval. Research and study abroad courses require departmental approval to count as major electives.

- AAEC(FDST) 4051E/6051E Food Law and Regulation
- AAEC 4720 Food Security, Econ. Development & Environ
- BCMB 3100 Intro to Biochemistry
- BCMB 4030L Bioprocess Technology
- BCMC 4200 Biotechnology
- BIOL 3110L Basic Skills in the Laboratory
- BIOS 3000 Intermediate Biostat. For Public Health
- CHEM 2300/2300L Quant. Analysis Chemistry
- CHEM 3300 Modern Instrumental Methods
- COMM 3320 Environmental Communication
- COMM/HPRB 4610 Health Communication
- CRSS(ECOL) 4930 Agroecol Tropical America
- CRSS(ECOL) 4931 Agroecol Tropical America Fld Trp
- DMAN 3100 Disasters and Society
- ECOL(BIOL)3500/3500L Ecology
- ECOL(BIOL)3510 Ecology Laboratory
- ECOL 3530/3530D Conservation Ecology
- ECOL 4150L Population Biology of Infectious Diseases
- ECOL 4310/4310L Freshwater Ecosystems
- EETH 4020 Readings in Environmental Ethics
- EETH 4200 Environmental Concepts
- ENTO 4250/4250L Pesticides/Transgenic Crops
- ENVE 4480 Instrumentation for Environmental Quality
- ENVE 4730 Environmental Justice: Evidence and Impact

EHSC 3910 - Internship in EHS (field experience)

- The field experience will be completed no earlier than the student's junior or senior year.
- The student will arrange for the field experience to be completed during one semester for a minimum of 3 credit
- hours.
 An additional 3 hours, once approved, may count towards non-EHSC electives.
- Students may earn up to 9 hours of EHSC 3910, but only 6 hours may count towards the degree.
- Students must be registered for the class and complete the internship in the same semester.

Review the internship process below:

- 1. Students review their individual eligibility via the EHS website.
- **2.** Students work with the EHS Field Experience Coordinator to identify a position that meets their personal interests and timetable. Required forms and process are available on the EHS website.
- **3.** Once the internship forms are approved, students are granted permission to register for the course by the coordinator.
- 4. Students engage in internship activities, then submit all forms required to finish internship.

Additional Information:

-Many courses require prerequisites, please consult the the UGA Bulletin at https://bulletin.uga.edu/.

-Important: Additional undergraduate classes may be needed for students pursuing pre-professional pathways (i.e. pre-med, pre-PA, pre-dental, pre-law, etc.). It is important that students review the admission criteria of their intended graduate professional program well in advance. Students are advised to meet with their intended graduate pre-professional advisor to ensure they are meeting all graduate application requirements, as well as reviewing their graduate application strategy and timeline. Learn more about the Pre-Professional Advising Office at https://pao.uga.edu/.

-Research for Credit

Research at UGA is a student-driven process. Students are responsible for identifying their preferences and working independently with faculty during this process. Consult with your academic advisor to learn about where credit may fall in your degree plan. Learn more on the CURO site here: <u>https://curo.uga.edu</u>.

EHSC 3700/4960R - Research

- Enrolling in a research course requires approval and registration clearance from the student's faculty mentor.
- Up to 6 credit hours of approved research may be used as non-EHSC major electives.

-Double Dawgs students

Once accepted to the Double Dawgs pathway, students may enroll in Double Dawg graduate level courses. Work with the Double Dawg Advisor for your individualized plan.

- ENVM 3060/E Principles of Resource Economics
- ENVM 4380 Environmental Management and Sustainable Business Prac.
- ENVM 4800 Water Resource Economics
- EPID 3100 Health Data Fluency and Management for Public Health
- EPID 4200 Epidemiological Aspects of Global Health
- FANR 3800/3800L Spatial Analysis of Natural Resources
- FISH 4500 Fish Physiology
- GENE 3200/D Genetics
- GEOG 4370/4370L Geog Info Sci (GIS)
- GEOG 4470 Analysis in GIS
- GEOL 4220 Hydrogeology
- *GLOB 3100 Introduction to Global Health
- *GLOB 3200 Global Health and the Links among Food Culture and Dis.
 * Only one of these courses can be taken to fulfill this requirement.
- HPAM 4100 The Age of Human and Social Capital
- MARS 3000 Coastal Zone and Marine Law
- MARS 3450/3450L Marine Biology
- MATH 2200 Analytic Geometry/Calculus
- MATH 2250 Calculus
- PBIO 3010 Fungi: Friends and Foes
- WASR(FORS) 4110 Forest Hydrology
- WASR 4500 Quantitative Methods in Hydrology
- WASR 4400/4400L Introduction to Wetlands
